

From President's Desk

Dear Students, I am pleased to inform you that Council of Architecture will be conducting National Aptitude Test in Architecture (NATA) 2017 on 16th April, 2017. Unlike previous years, this year it will be a single day pen & paper based Test. Please refer NATA 2017 Brochure for more details.

Friends, Architecture is called the mirror of the Society and also civilization's way of forming itself. This profession involves imagination, aesthetics, technological challenges and creation of an architect remains a masterpiece forever. Architect continues to be widely recognized as a leader of the building team, performing the dual role of building designer, in which he is able to contribute the results of his specialist training in innovative design, and construction organizer, all within the setting of a traditional form of contract.

Architecture is the driver of economy and Architects have very important role to play in Government's various initiatives such as Smart Cities, Swachcha Bharat Abhiyan, MNREGA, Housing & Sanitation for all, etc. apart from meeting the growing demand of Indian construction industry.

I wish you all success for the test and for your entry to Architecture Course.
